

◆ Managed VSAT Services

Robust Connectivity for a Resilient Network

Service Offering

Es'hailSat provides top-of-the-line Very Small Aperture Terminal (VSAT) services and associated communication solutions for government, telcos and enterprises, using small satellite dishes and reliable modems backed by our high-speed connectivity on two co-located satellites on neighboring orbital slots. With our managed VSAT service, you can communicate with ease from anywhere within the MENA region, whether you're located in remote areas, disaster zones, oil rigs, or mining sites. Our managed VSAT network operates in the Ku-band or Ka-band frequency ranges, providing lightning-fast data transfer speeds and reduces customer complexity and cost of managing satellite network operations.

Es'hailSat's End-to-End Managed Network Service

VSAT Feature Set

Support wide range of antenna size

Operates in Ku/Ka frequencies

World class teleport facility hosting the service

Fully redundant setup

DDoS protection on provisioned public internet

Expert Engineering Support

24x7 customer support in English and Arabic

Expandable with a host of optional add-on features

FAQ

Q1. What is the Managed VSAT Service offered by Es'hailSat?

Es'hailSat's Managed VSAT service offers a range of options with different bandwidth, data volume, and service level agreement (SLA) options to meet the specific needs of different customers. As a service provider Es'hailSat also provides the necessary hardware and software for the VSAT network and monitors the network performance, provides field engineering services, technical support, and performs maintenance on the hardware and software.

Q2. What are the main benefits of using Es'hailSat's Managed VSAT Service?

 Quality of Service	Es'hailSat uses best-in-class hub and remote terminal solutions offering a level of performance, functionality, and innovation that others aspire to achieve.
 Flexibility	Es'hailSat's managed VSAT service offers a range of plans with different bandwidth and service level agreement (SLA) options to meet the specific needs of different customers.
 Adaptability	Es'hailSat's managed VSAT can be easily integrated with other telecommunication networks such as for cellular backhaul, maritime networks, etc. to provide a complete end-to-end service.
 Cost Savings	Tailored solution through optimized design by engineering expert on suitable bandwidth plan with associated QoS and contention ratio result in cost savings.
 High Speed Data	Es'hailSat's managed VSAT network operates in the Ku-band or Ka-band frequency ranges, providing scalable bandwidths for lightning-fast data transfer speeds.
 Reliability	Es'hailSat's managed VSAT service is designed to be highly reliable and actively managed 24x7 by professionals to ensure that the system is functioning optimally and delivering the desired results.
 Field Support	Es'hailSat's team of trained and certified field engineers ensures that you always have someone to help you if you encounter any issues and installation & maintenance is hassle-free.
